Introduction ix

Peptides and Proteases in Immune and Inflammatory Processes

S. Ansorge and E. Schön, *Dipeptidyl Peptidase IV in Human T Lymphocytes: An Approach to the Function of this Peptidase in the Immune System* 3

M.G. Colomb, G.J. Arlaud, C. Aude and A. Journet, *The Role of Proteolytic Enzymes in the Complement System* 11

H.-D. Flad, M. Gruber, W. Scholz, A.C. Feller, A.J. Ulmer and E. Heymann, *Phenotypic and Functional Characterization of Human T-Lymphocytes Defined by Monoclonal Antibody Against Dipeptidyl Peptidase IV (DPP IV)* 19

C.J. F. Van Noorden and I.M.C. Vogels, *Cathepsin B Activity in Unfixed and Recalcified Cryostat Sections of Normal and Arthritic House Knee Joints* 27

Processing and Activity of Bioactive Peptides

G. Koch, K. Wiedemann, E. Drebes, W. Zimmermann, G. Link and H. Teschemacher, *Human β-Casomorphin-7 Immunoreactive Material in the Plasma of Women During Pregnancy and After Parturition* 35

H. Teschemacher, *Casein-Derived Opioid Peptides: Physiological Significance?* 41

K. Lalu, S. Lampelo and T. Vanha-Perttula, *Studies on Dipeptidyl Peptidases I-IV of the Human Placenta* 49

J.R. Garrett and R.E. Smith, *Studies on the Secretion of Salivary Kallikrein* 57

F. Nyberg, *Peptidases in Human Cerebrospinal Fluid Converting Dynorphin and Substance P to Bioactive Fragments* 65

J.M. Stewart and R.J. Vavrek, *Bradykinin Competitive Antagonists: Design and Activities* 73

Peptide Transport

D.M. Matthews, *Peptide Transport: The Concept and Its Development* 83

V. Ganapathy, Y. Miyamoto and F.H. Leibach, *Properties and Physiological Functions of Mammalian Renal Peptide Transport System* 91

M.L.G. Gardner, *Passage of Intact Peptides Across the Intestine* 99

T.M. Hagen and D.P. Jones, *Transport of Glutathione in Intestine, Kidney and Lung* 107

T. Hoshi, M. Abe and A. Tajima, *Stoichiometry and Specificity of the Proton/-Peptide Cotransport Across Intestinal Brush Border Membranes* 115

D.R. Peterson, *Renal Handling of Hormonal Peptides* 121

A. Tsuji, *Intestinal Uptake of β-Lactam Antibiotics and its Relationship to Peptide Transport* 125

Peptide Synthesis Using Proteases

W. Kullmann, *Protease-Catalyzed Peptide Synthesis* 135

I.M. Chaiken, S. Ando and G. Fassina, *Enzymatic Synthesis and Processing and the Formation of Biologically Active Peptides and Proteins* 141

V. Kasche, *Mechanism and Maximum Yield in Kinetically Controlled Peptide Synthesis* 151

V. Schellenberger, U.-K. Hanisch, A. Könnecke and H.-D. Jakubke, *Attempts for Quantifying the S' Subsite Specificity of Serine Proteases* 159

H. Zahn, H.-G. Gattner, W. Fischer, A. Jonczyk and A. Wiese, *The Use of Enzymes in the Semisynthesis of Insulin Analogues* 167

Inhibition of Proteases

G. Amiconi, P. Ascenzi, M. Bolognese, M. Guarneri and E. Menegatti, *Enthalpy-Entropy Compensation Phenomena in Serine (Pro)Enzyme:Inhibitor Complex Formation* 177

H.-U. Demuth, U. Neumann and A. Barth, *Dipeptidyl Peptidase IV Catalyzed Hydrolysis of Azapeptide Substrate Analogs* 181

J. Dodt, C. Bergmann, H. Appelhans, R. Heinzel and H.G. Gassen, *Chemical Gene Synthesis and cDNA Cloning in Competition: Cloning of Genes Encoding Proteinase Inhibitors* 189

T. Hayakawa, J. Kishi, T. Kawai, T. Hoshino and K. Kobayashi, *Animal Collagenase-Specific Inhibitor: Structural and Functional Characterizations and Localization* 197

I.M. Kovach and R.L. Schowen, *Catalytic Recruitment in the Inactivation of Serine Hydrolases by Phosphonate Esters* 205

A. Krantz, L.J. Copp and R.W. Spencer, *Design of Alternate Substrate Inhibitors of Serine Proteases. Tactics for Obstructing Deacylation Pathways* 213

Mechanisms of Action of Proteases and Related Enzymes

P. Douzou and G. Hui Bon Hua, *Probing Enzyme Dynamics and Regulation by Cryo-Studies* 223

J. Heins, K. Neubert, A. Barth and R.L. Schowen, *Molecular Modeling of the Specificity Requirements of Dipeptidyl Peptidase IV* 231

M.I. Page and S. Buckwell, *β-Lactamases - Normal Peptidases?* 241

K.H. Röhm, *Nuclear Magnetic Resonance Studies of Amidase Catalysis* 249

D. Tsuru, *An Epoxide-Reactive Residue in Scytalidium lignicolum Acid Protease B: Possible Involvement of Glutamic Acid Residue in the Catalytic Activity* 257

The Catalytic Power of Proteases

V.K. Antonov and S.L. Alexandrov, *The Destabilization of Amide Group as the Possible Reason of Proteases Efficiency and Specificity* 265

C.W. Mordy and R.L. Schowen, *Theoretical Aspects of the Catalytic Power of Serine Proteases: On the Role of Quantum Tunneling* 273

M.B. Palma-Vitorelli and M.U. Palma, *Thermodynamic and Microscopic Aspects of Stability and Functional Interactions of Biomolecules in Solution* 281
